Trickle

Trickle is an online platform enabling organisations to build a better workplace and achieve better business performance by engaging, collaborating and supporting the health and wellbeing of their people.

Trickle gives your people a voice to openly share concerns, issues and suggestions. As an organisation, you can listen, engage and innovate by focusing on what's important and tackling emerging issues before they grow into bigger problems.

Using Trickle you can regularly check-in with your people, send them proactive guidance and raise awareness of new policies. Your people can also actively reach out for health and wellbeing support 24/7 in a safe and confidential environment.

With its powerful dashboard analytics, you'll gain insights to make better and more strategic decisions to achieve your organisational goals.

Trickle is helping a wide range of organisations to create first-class cultures and drive tangible business returns.
